# INVENTORY + ACCOUNTING

## What is Inventory + Accounting?

I + A offers the most advanced cloud-based Software to maintain single and loose diamond inventory with accounting management to diamond industries or other business like retail business, embroidery, super-mart and type of small and large business. It is a robust inventory management software which covers almost all requirements of your business management. I + A is a comprehensive desktop-based application with one database on cloud server and it doesn't matter how many offices, branches, outlets or factories your organization possesses.

I + A software allows your staff to search Product inventory and take action like send to memo, sales order, to sale, branch transfer, issue for any kind of process and many more actions. It has an easy-to-operate and understand rich user-interface, robust software tech and great concepts. By using I + A, we let your team focus on the core business activities with help of lots of tools to make a decision quick and know your day-to-day selling and production report and also find out what kind of mistake has reduced your profit and help to solve it, you can manage month-wise comparison of production and sell, also compare current and previous month graphs and also compare employee improvement graphs.
